EDUCATION

Columbia University

Master of Science in Data Science

New York City, New York

August 2026 - December 2027

Carnegie Mellon University

Bachelor of Science in Statistics and Machine Learning; Minor in Business Analytics & Optimization

Pittsburgh, Pennsylvania

August 2022 - May 2026

WORK/PROJECT EXPERIENCE

The New York Times

Data Analyst Intern, Algorithmic Targeting Team

New York City, New York

June 2025 – August 2025

- Validated ML model performance across regions using SQL, dbt, and Mode, identifying friction decisions for international users
- Analyzed 10M+ access decisions against user reactions within sessions, providing validation of prior user research findings
- Synthesized complex behavioral data into technical slides for DIG, highlighting regional growth trends to support growth strategy
- Collaborated with a cross-functional team of interns and a TPM during Maker Week to prototype and pitch a new product feature

Horizon Advisory

Data Analyst Intern

Pittsburgh, Pennsylvania

June 2024 – August 2024

- Analyzed dataset on China's potential academic leaders, inventing new categories to resolve company's data quality issues
- Automated information extraction for new categories, demonstrating improved dataset utility to support suggested enhancements
- Enhanced web scraper tool by implementing parsing algorithms to extract data from unique websites to improve data quality
- Presented comparative analyses showing advantages of web-scraped dataset over the original, emphasizing its future potential

CMU Concepts, Actions, and Object Lab

Research Assistant

Pittsburgh, Pennsylvania

August 2023 – May 2024

- Developed a program in Python utilizing OS, NumPy, and OpenCV to extract thousands of frames from videos for a dataset
- Implemented neural network models using Fastai2 library, evaluating various model accuracy using original and altered frames
- Designed research program on PsychoPy to test intuitive physics in participants utilizing the same frames tested with the models
- Facilitated experiments on 40+ participants to collect data to compare the difference between human and models' accuracy

PROJECTS

“Traffic Stops in Hartford, Connecticut” Project

November 2023

Statistical Graphics & Visualization Final Group Project | <https://tinyurl.com/39tsmvfc> | R (Tidyverse, ggplot)

- Conducted in-depth analysis on a dataset of 18k+ using R, focusing on geographic distribution of traffic stops
- Generated interactive graphs, identifying a potential trend of higher frequency of arrests that can be generalized to other areas

LEADERSHIP EXPERIENCE

Data Science for Product Manager (05-898)

Teaching Assistant

Pittsburgh, Pennsylvania

January 2025 – May 2025

- Advised a 50-student master's course by hosting office hours and 1:1 sessions to guide analysis and critical thinking
- Coordinated with professor and TAs to align homework and course content on topics from exploratory questions to ML basics

Carnegie Mellon University First-Year Orientation

Head Orientation Counselor

Pittsburgh, Pennsylvania

December 2024 – December 2025

- Supervised 130 Orientation Counselors, equipping OCs to guide 1800+ incoming students through transition into university life
- Redesigned orientation program structure by executing engagement strategies, boosting in 23% increase from last year

Kappa Kappa Gamma Delta Xi Chapter

Vice President of Finance

Pittsburgh, Pennsylvania

November 2024 – December 2025

- Educated members on financial responsibilities, fee structures, and the chapter's budget to foster greater financial transparency
- Managed an annual chapter budget of approximately \$100k+, overseeing all financial operations, payments, and reimbursements

Asian Students Association

Treasurer & Financial Chair

Pittsburgh, Pennsylvania

October 2023 – December 2025

- Conducted strategic assessments of revenue streams, pinpointing high-profit items and setting a revenue record of \$5000+
- Monitored \$30k+ budget to plan events for 600+ members, coordinating ASA Night Market featuring 12 cultural organizations

SKILLS / INTERESTS

Programming Languages: Python (NumPy, Pandas), SQL, R, HTML, CSS, LaTeX

Software: Tableau, Mode, Google BigQuery, Microsoft Excel, Git/GitHub, DBT

Interests: Sports Photography, Learning Languages (Korean—Native; English—Native; Japanese—In Progress), Sudoku
